INTRODUCTION

This report follows the format of the **Leading Indicators Report (LIR)**, which was originally developed in 2010 with a joint effort between Michigan Department of Education (MDE), the Technical Assistance and Coaching Support System (TACSS) team at The Forum for Youth Investment's Center for Youth Program Quality and the State Evaluation Team at Michigan State University (MSU). The Indicators are organized under the two contexts in the current version:

Instructional Contexts

- 1.1 Enrollment and Continuous Participation
- 1.2 Academic Content
- 1.3 Enrichment Content
- 1.4 Connections to School Day
- 1.5 Instructional Quality

Management Context

- 2.1 Stability
- 2.2 Grantee Management
- 2.3 Site Program Management
- 2.4 Professional Development
- 2.5 Staff Qualifications
- 2.6 Continuous Improvement and Evaluation
- 2.7 School Connection
- 2.8 Stakeholder Involvement
- 2.9 Family Communication

For detailed information on how each Indicator is calculated, read the **Leading Indicators Report Interpretation Guide**. This Data Table provides additional information on the indicators to further support your quality improvement efforts. It also includes a third section on **Youth Outcomes** to help demonstrate the impact of your program.

Data source. The sources and data used in this Data Table include:

- EZReports (for participants' characteristics, attendance, and activity offering)
- School outcome records (for school GPA/grades) 7th, 8th, and 10th – 12th
- Site Coordinator Survey (for Site Coordinator's report on program policy and procedures)
- Staff Survey (for staff's perception of program quality, policy and work climate)
- Teacher Survey (for changes in classroom behavior, homework completion, and growth mindset) 1st – 8th
- Youth Program Quality Assessment/YPQA scores (for staff's self-assessment on practices around safe environment, supportive environment, interaction, and engagement)
- Youth Survey (for changes in youth developmental assets and program satisfaction) 4th – 12th

Comparisons to the state. Most tables in this report compare data from this grantee to data from other grantees across the state. Each of these tables indicates whether the data for your grantee is "Very high", "High", "Average", "Low", or "Very low" compared to others. To determine these cutoffs, we used the Standard Deviation (SD), which is a measure of how far a score is from the average score. Assuming scores are "normally distributed", which will form a bell shape as displayed in Figure A. In this report, an "Average" means the score is within the 0.5 SD from the average (mean), a "High" or "Low" means the score is between 0.5 to 1 SD

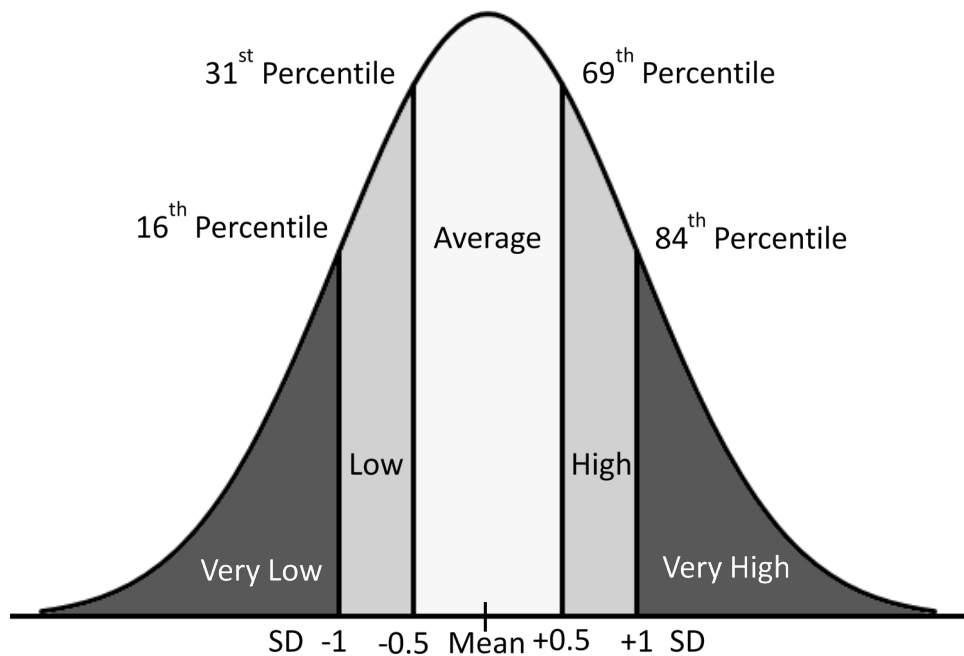

Figure A. How to Interpret Your Score

from the average, and “Very high” or “Very Low” means the score is more than 1 SD away from the average.

Understand Your Score. Based on the same assumption of the normal distribution, “Very high” means the score is between 84th and 100th percentiles, “High” means the score is between 69th and 83rd percentiles, “Average” means the score is between 31st and 68th percentiles, “Low” means the score is between 16th and 30th percentiles and “Very low” is between zero and 15th percentiles. You might see a score being considered as “Average” even though the number is much higher or lower than the state average. That means, in practice, there is a wide range of scores in the state and therefore it might not be a meaningful difference. On the other hand, you might see your scores being very close to the state average but are noted as “Low” or “High.” In that case, most of the programs would have similar scores close to the state average, and therefore slight differences in scoring might mean very different things. You will need to use your best judgment to decide how comparisons to the state average might be meaningful to you.

Important Note. For the Site Data Table, state comparison data is based on the youth or sites from similar grade levels. However, for the Grantee Data Table, the state comparison is based on all youth in the 21st CCLC programs because most 21st CCLC grantees serve a wide range of grade levels and therefore there is a lack of grantees serving only high-school, middle-school, or elementary-school aged youth to be used for comparison.

Data Included in the report. To ensure the data represent your program and protect confidentiality, we only include scores when enough people provided answers to questions. We set the reporting threshold as follows:

- Youth and Teacher Surveys: at least 15 respondents must have turned in the survey
- Staff Survey: at least 3 respondents must have turned in the survey

Data that do not meet the threshold will be identified as “**Insufficient data**” and excluded from the report.
